

## Please read the following important information before starting the course!

---

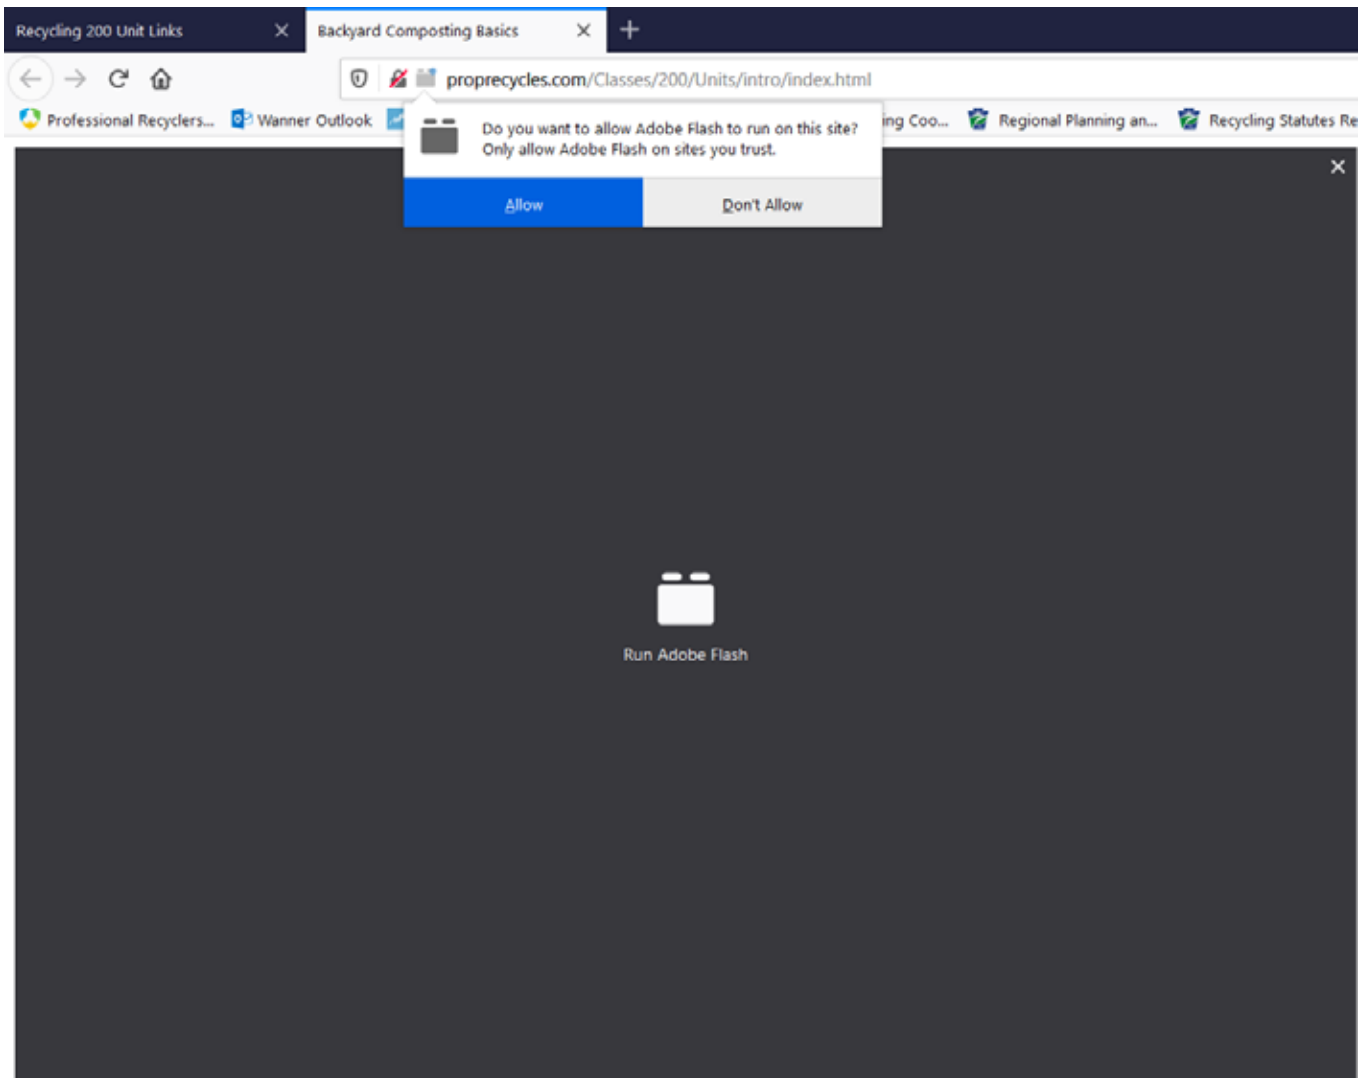

The PROP Online Courses were built using FLASH, browsers such as (Firefox / Chrome / MS Edge) will no longer support FLASH at the end of 2020. With this in mind, browsers are defaulted to not allow FLASH to play without your permission.

The following three pages will show you how to enable FLASH in all the browsers mentioned. You will only need to do this once, if you take the entire course at one time. If you only do a couple of the units and then close your browser, when you open it to take the remainder of the units you will need to enable FLASH again.

Enabling FLASH in the Firefox browser when accessing the course units:

When you click on a link for one of the following units (Introduction through Unit 7), you will see a block pop up showing (Run Adobe Flash) when you click on the logo, a window pops up asking if you want to "Allow" Adobe Flash to run on this site.

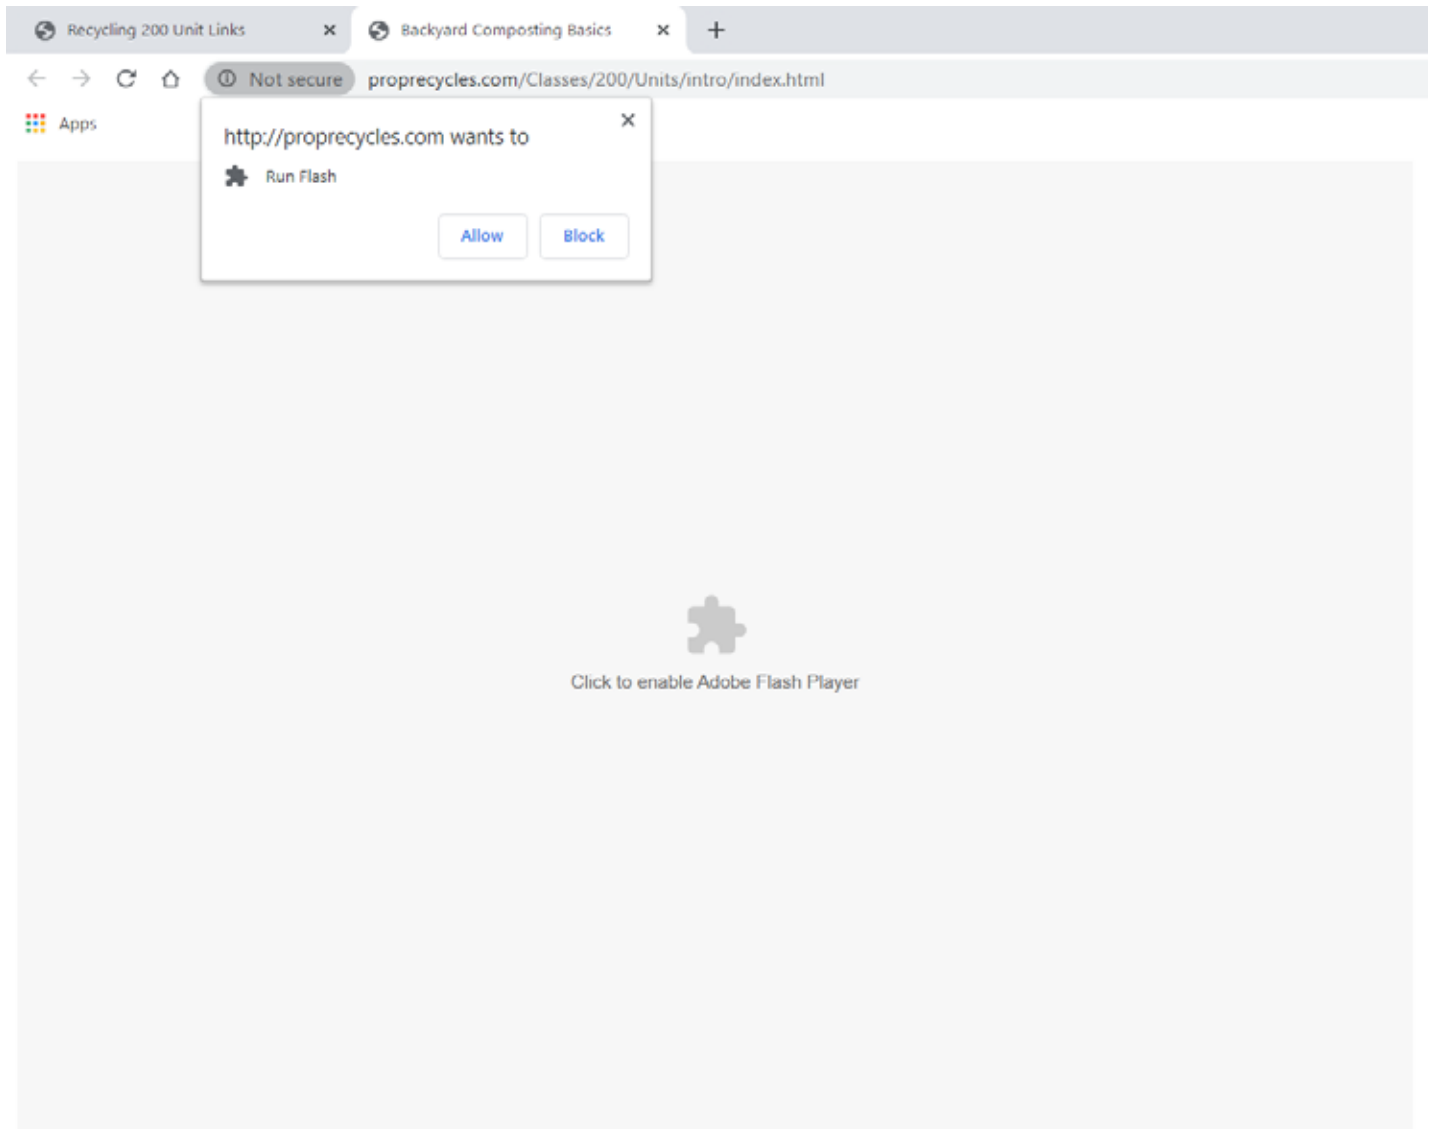

Clicking Allow will start the class Units.

**Enabling FLASH in the Google Chrome browser when accessing the course units:**

**When you click on a link for one of the following units (Introduction through Unit 7) you will see a block pop up showing (Click to enable Adobe Flash) when you click on the logo, a window pops up asking if you want Run Flash.**

**Clicking Allow will start the class Units.**

**Enabling FLASH in the Microsoft Edge browser when accessing the course units:**

When you click on a link for one of the following units (Introduction through Unit 7), you will see a block pop up showing (Select for Adobe Flash) when you click on the logo, a window pops up stating Adobe Flash Content was blocked.

Clicking Allow Once will start the class Units.
